

ML SERIES

ML Series Cart

Karsten began manufacturing this cart in 2001. The unique cart design also maximizes shipping efficiency. The benefit of this cart is that it will collapse. This cart works well with other options such as laser cut plates and pull handles. Currently, this model is available in two sizes, ML 3143 and ML 3163.

Cart can be easily maneuvered with our handles.

Our drop pin/braking combination keeps the carts safely in place while on the truck or at your customers.

Our unique laser cut name plates are sure to add value in appearance and assist in cart identification.
